Why Ethics in AI Matters

 **AI can be powerful — but also harmful if misused**

 **Ethical AI = Fair, Transparent & Safe**

 **Without ethics: AI can lead to bias, harm, and mistrust**

What Ethical AI Looks Like

-  **Inclusive data = diverse and representative**
-  **Explainable AI = understandable logic**
-  **Human oversight = checks & balances**
-  **Privacy = built-in protection**

Who's Responsible?

Not just coders —

 Business leaders, 

Designers,   Policymakers &

 Everyday users all play a
role

 Ethical AI needs
collaboration and awareness

Final Thought

 **Let's build tech that's not just smart — but also fair, safe, and human-centered.**

 **The future is ethical, or it isn't the future.**
